About This Game

This game is called answer the question you get infinite questions its a game about math. If you are studying and want to play a game choose this one this game has addition so start playing and get smart!

Title: Answer The Question
Genre: Casual, Indie
Developer:
Penny McDonald
Publisher:
Say Again Studio
Release Date: 2 Aug, 2018

b4d347fde0

English

I read about Penny's game on a Danish Tech news site and i have to say it's a great story, keep fanning that flame and i'm sure the young lady will go far in life.

Good job Penny, me and my kids love your game !. This is extremely delightful.. It may not have the flare of a Math Blasters or other math games, but it gets to the core of what those games are about: Math. It has simple intuitive design and keeps score! Best of all, this game was designed by a 7 year old girl. I think she will have a bright future both in mathematics and programming. I hope if she gets support for this that maybe in the future we could see new modes. Perhaps subtraction mode is next?. Excellent first game. The developer has much promise for somebody their age. Worth supporting 100%. Keep up the excellent work.. Loved the backstory of the game and it's actually fun to use do ye old maths again :D I hope it earns some noms. Loved the backstory of the game and it's actually fun to use do ye old maths again :D I hope it earns some noms. Very well made game -- Runs well, and I didn't encounter any bugs or problems. It's fun seeing how high of a score you can get!

If there's ever a second game, one fun idea could be to add a timer to each question, and bonus points could be earned based upon how quickly you answered :O

10V10, very worth it for the price :D. I was not sure if my computer was powerful enough to run this, but it runs like a dream. Great game.. A devilishly clever test of wit. I highly recommend to anyone seeking to improve themselves while having a good time. I eagerly await future offerings from this developer.

This is the first game of a 7 year old, to be able to release it and make it available to the world, that was unthinkable when I was 7. For that small price it is worth supporting. The Game itself is basic (pun intended), short fun.. I read about Penny's game on a Danish Tech news site and i have to say it's a great story, keep fanning that flame and i'm sure the young lady will go far in life.

Good job Penny, me and my kids love your game !. One day, when I was 7, my dad brought me an old computer that had just been discarded from his workplace. It had MS-DOS installed, but I didn't know that at the time. Being used to the Windows 95 computers we used at school to learn text processing, I didn't even know what to do with it, and my dad didn't either. Eventually, I discovered that I could make the computer show stuff on the screen by typing certain words (duh!), so I spent hours in front of the computer typing in random words to see if something would come up, and writting down on a piece of paper every word and letter combination that would show something on screen.

So yeah, 7 year old me didn't know how to computer. This girl wrote a videogame and got in on Steam.

Keep going! You have a bright future ahead of you =). A devilishly clever test of wit. I highly recommend to anyone seeking to improve themselves while having a good time. I eagerly await future offerings from this developer.. I read the girls story and could not wait to jump at the chance to support her! These days people are so glued to their phones and calculators that they dont seem to have the brain power to do even simple math. This was a great exercise for even my 34 year old brain. Its been so long since I've sat down and did some good old fashioned math, and I encourage everyone to do the same! I'm looking forward to when she learns how to use randomizers! Keep up the great work Penny!. Well done, the deceivingly hard questions really throw you for a loop. Wish this developer would make an Adventure or Action game one day, really looking forward to future offerings.. I bought this game so that I could proclaim that I was there at the beginning of greatness.

update: I voted this game for "Most Fun with a Machine" award in the 2018 Steam Awards.. I was given a choice of wasting more money on CS:GO skins or supporting the future of a 7-year old programmer. Glad I picked up this game. Can't wait to see what Penny creates next!. Excellent first game. The developer has much promise for somebody their age. Worth supporting 100%. Keep up the excellent work.. Solid stuff. Hope to see an update that includes subtraction, apparently I'm not quite as good at maths as I thought.
